## Customer Support Engineer (CSE, Male, INDIA)

We at Gantner Instruments India design products that acquire data at high speed and the highest quality from a wide variety of sensors. This data must be stored, processed, and visualized - in real time.

We seek someone enthusiastic about innovative solutions, curious and passionate about measurement technology, who enjoys an extraordinary team spirit and wants to make a difference, and who can convince us with their expertise in the field and at the desk.

### Your qualifications:

- Experienced in handling data acquisition systems
- Knowledge about sensors used in test & measurement applications
- Independently handle the installation of DAQ systems and integrate them with the test equipment
- Minimum 3 years experience in Labview development
- Background in LabVIEW programming, development, troubleshooting, testing, software support, and maintenance
- Recognized Diploma (ECE/EEE) or B.E. (ECE/EEE/E&I) required
- Good communication and presentation skills
- Proficient in computer skills
- Strong relationship-building skills
- Willingness to travel extensively nationwide as required
- Timely completion of tasks and proper documentation skills

### What to expect:

- Maximum independence & personal responsibility
- Interesting & varied customer structure
- Attractive base salary and bonus
- Benefits package (Health/Accidental)
- Excellent career growth
- Job Location: **Chennai, INDIA**
