

**Breaking new ground.
Developing intelligent
solutions.**

Together we are creating
the measurement & testing
technology of the future.

Gantner Instruments is a leader in industrial metrology located in Austria, Germany, France, Sweden, USA, Singapore, Hong Kong, China, India.

To support our team in Lauf an der Pegnitz, Germany, we are looking for a ...

Working Student Measurement Technology

(m/w/x)

At Gantner Instruments, we can acquire data at high speed and of the highest quality from a wide variety of sensors. This data must be stored, processed, and visualized - in real-time.

Your qualifications:

- You are enrolled at a college or university in a STEM subject area
- You are enthusiastic about measurement technology, electrical engineering, and software in general
- You show curiosity and open-mindedness for the practical application of complex systems
- You work in a structured and independent manner and are confident with MS-Office
- You are committed and a team player
- You have a good command of German and English

What expects you:

- An interesting field of activity in a modern and innovative company
- Exciting, practical tasks and intensive guidance from our systems engineer
- A pleasant working atmosphere, where fun at work is never neglected
- A high degree of independence and personal responsibility
- Flexible working hours
- Excellent public transport connections

Your responsibilities at our company:

- You will play a decisive role in the development of metrological solutions
- You will create and execute test sequences for the verification of applied measurement technology
- You will support the development of applications, system configuration and the creation of, e.g., Python scripts.
- You will be involved in the project work in the office and, if necessary, you can also expect assignments with our customers
- You will create reports and project documentation, e.g., requirement specifications or acceptance protocols.
- You will support test setups and dismantling, as well as measurement campaigns
- You will participate in the general project coordination
- You will take over tasks in the general daily business

Your application
